

## BCPS Magnet Programs Middle School Programs

### Exploratory

Students explore applied engineering, environmental engineering (SEAS), mass communications, and visual/graphic arts in practical applications. Students participate in all areas during their first year and are assigned by lottery to two pathways of study in Grade 7 and one pathway in Grade 8. The engineering-related pathways incorporate pre-engineering curricula and Next Generation Science Standards.

*\*Please note, students zoned for Parkville Middle School will apply for the Exploratory program directly through Parkville Middle; they should not submit an Online Magnet Application unless applying to other BCPS magnet programs. Information regarding the process for in-zoned students to apply to the Exploratory program will be distributed to feeder elementary schools in the fall of each year.*

*-available at Parkville Middle School (PMS)*

### **Parkville Middle School and Center of Technology**

8711 Avondale Road

Baltimore, Maryland 21234

443-809-5250
