

BCPS Magnet Programs High School Programs

Project Lead The Way (PLTW) Biomedical Sciences *‡ □

This program offers an intense focus on the concepts of human medicine and biomedical innovations through an introduction to physiology, genetics, microbiology and public health. PLTW courses are structured so students acquire strong teamwork and communications skills. Students develop organizational, critical-thinking, and problem-solving skills as they investigate various health conditions and infectious diseases, examine the interactions of human body systems, and explore how to prevent and fight infection. Students in the program may participate in an internship, clinical experience, and conduct independent research in the biomedical sciences field.

* *Articulated college credit may be earned from the Community College of Baltimore County.*

‡ *Students may earn a minimum of four MSDE Career & Technical Education (CTE) credits for graduation.*

□ *Transcripted credit may be earned from Stevenson University, CCBC, and various out-of-state universities.*
