

## BCPS Magnet Programs High School Programs

### Carpentry Careers\*‡

This program provides students with information and experience related to residential and commercial construction. Safety, hand and power tools, leveling instruction, foundation layout, floor and wall construction, roof construction, blueprint reading, forming, and job estimating are units of instruction emphasized for carpentry students. Carpentry students will complete the National Center for Construction Education and Research (NCCER) Core Learning and Carpentry Level One certification exams. Students at Carver are also taught the unique skills associated with set construction, theater set-up, and related performing arts project construction. Students who successfully complete the program are eligible for advanced placement in the Associated Builders and Contractors' (ABC) Apprenticeship Program. They may also be eligible for advanced placement and/or testing opportunities through union or non-union apprenticeship programs and earn national craft certification through NCCER.

\* *Articulated college credit may be earned from the Community College of Baltimore County.*

‡ *Students may earn a minimum of four MSDE Career & Technical Education (CTE) credits for graduation.*
